

CORRIGENDUM

Aust. Met. Magazine Number 41, June 1963, page 2.

Correction to Fig. 1 of "TIROS VI Picture
of 'Fish-bone' Cloud Pattern" by G. T. Rutherford.

The orientation of the cloud feature in this figure is in error. The north direction should be turned through 180 degrees.

With this orientation the 'fish-bone' pattern appears in its true position as described in the text, on the warm side of the cold front cloud, portion of which appears in the top right hand corner of the figure. No change is necessary in the text.

The author is indebted to Mr. L. F. Hubert, National Weather Satellite Centre, U.S. Weather Bureau, for drawing attention to this error.
