

CORRIGENDUM

Aust. Met. Magazine No. 45, June 1964.

On page 6, in Table 1 of the article by Linacre, read the second column of figures under the heading "Vapour Pressure, e_a (mmHg)" as 14.1, 11.2, 11.1, 8.5, 7.5, 7.7, 6.5, 7.1, 7.7, 7.3, 7.7 and 10.7 instead of 22.1, 20.8, 18.3, 13.4, etc.

This error had in no way affected the rest of the paper as the correct values were used in making the calculations based on Table 1.
