

INDEX

SUBJECT INDEX

- A pyranometer for measuring ultraviolet radiation, 141
- A 10 level fine mesh forecast for Australia and New Zealand, 35
- An instrumented radio-controlled model aircraft for boundary layer, 149
- Application of the linear Discrete Filter to the processing of meteorological rocket wind data, 12
- Australia and New Zealand, A 10 level fine mesh forecast for, 35
- Basic data set project for GARP planning, The, 43
- Basic data set analysis project. The first experiment - November 1969, GARP, 48
- Boundary layer measurements, An instrumented radio-controlled model aircraft for, 149
- Calibration, Radiometer, 83
- Currents, Recent work on waves, tides and, - Joint Colloquium, 136
- Cyclone vortex, Synoptic ozone observations during the passage of a, 1
- Discrete Filter to the processing of meteorological rocket wind data, Application of the linear, 12
- Fine mesh forecast for Australia and New Zealand, A 10 level, 35
- GARP planning, The basic data set project for, 43
- GARP basic data set analysis project. The first experiment - November 1969, 48
- Helmholtz-type equation, Implications of a direct method for solving the, 130
- Implications of a direct method for solving the Helmholtz-type equation, 130
- Instrumented radio-controlled model aircraft for boundary layer measurements, An, 149
- Lidar probing of the troposphere, Radiometric and, - Joint Colloquium, 135
- Linear Discrete Filter to the processing of meteorological rocket wind data, Application of the, 12
- Mesh forecast for Australia and New Zealand, A 10 level fine, 35
- Movement of oil on the sea surface, 158
- New South Wales, Rainfall regimes of northeastern, 91
- New Zealand, A 10 level fine mesh forecast for Australia and, 35
- Oil on the sea surface, Movement of, 158
- Ozone observations during the passage of a cyclone vortex, synoptic, 1

- Pressure wave in Western Australia, Quasi-weekly, 117
 Pyranometer for measuring ultraviolet radiation, A, 141
- Quasi-weekly pressure wave in Western Australia, 117
- Radiation, A pyranometer for measuring ultra-violet, 141
 Radio-controlled model aircraft for boundary layer measurements, An instrumented, 149
 Radiometer calibration, 83
 Radiometric and lidar probing of the troposphere, - Joint Colloquium, 135
 Rainfall regimes of northeastern New South Wales, 91
 Recent work on waves, tides and currents, - Joint Colloquium, 136
 Rocket wind data, Application of the linear Discrete Filter to the processing of meteorological, 12
- Sea surface, Movement of oil on the, 158
 Synoptic ozone observations during the passage of a cyclone vortex, 1
- Ten level fine mesh forecast for Australia and New Zealand, A, 35
 Tides and currents, Recent work on waves, - Joint Colloquium, 136
 Troposphere, Radiometric and lidar probing of the, - Joint Colloquium, 135
- Ultraviolet radiation, A pyranometer for measuring, 141
- Vortex, Synoptic ozone observations during the passage of a cyclone, 1
- Waves, tides and currents, Recent work on, - Joint Colloquium, 136
 Western Australia, Quasi-weekly pressure wave in, 117
 Wind data, Application of the linear Discrete Filter to the processing of meteorological rocket, 12
