

Indexes –volume 54

Subject index

- A consensus track forecast for southern hemisphere tropical cyclones, 115
- air pollution events at Cape Grim to the modelled meteorology, The sensitivity of simulations of, 321
- A notable frost hollow at Coonabarabran, New South Wales, 15
- A re-examination of the synoptic and mesoscale meteorology of Ash Wednesday 1983, 35
- Australian summer maximum temperature lags, 103
- A verification of publicly issued seasonal forecasts issued by the Australian Bureau of Meteorology: 1998-2003, 1

Book reviews

- A change in the weather: climate and culture in Australia*, 263
- An Introduction to Dynamic Meteorology*, 175
- Climate Change: An Australian Guide to the Science and Potential Impacts*, 87

- Climate and culture connections in Australia, 309
- Climate variability, climate change and the Australian snow season, 177
- Comparisons between topographically surveyed debris lines and modelled inundation levels from severe tropical cyclones *Vance* and *Chris*, and their geomorphic impact on the sand coast, 187

Conference review

- Greenhouse 2005: Impressions, 365
- Coupled model simulations of current Australian surface climate and its changes under greenhouse warming: an analysis of 18 CMIP2 models, 291
- Establishing the limits of predictability at Melbourne, Australia, using a knowledge-based forecasting system and NOAA's long-range NWP model, 203
- fire weather days during the Eastern Australian fires of January 2003, On the subsynoptic-scale meteorology of two extreme, 265
- frost hollow at Coonabarabran, New South Wales, A notable, 15
- inundation levels from severe tropical cyclones *Vance* and *Chris*, and their geomorphic impact on the sand coast, Comparisons between topographically surveyed debris lines and modelled, 187
- Long-term variations in winter rainfall of southwest Australia and the African monsoon, 91

- Numerical weather prediction model performance summary January to March 2004, 83
- Numerical weather prediction model performance summary July to September 2005, 361
- numerical weather prediction model performance summary - April 2004 to June 2005, Quarterly, 253

- On the subsynoptic-scale meteorology of two extreme fire weather days during the Eastern Australian fires of January 2003, 265

- predictability at Melbourne, Australia, using a knowledge-based forecasting system and NOAA's long-range NWP model, Establishing the limits of, 203

- Quarterly numerical weather prediction model performance summary - April 2004 to June 2005, 253

- rainfall in the southwest of Western Australia and near-global patterns of sea-surface temperature and mean sea-level pressure variability, Relationships between, 23

- rainfall of southwest Australia and the African monsoon, Long-term variations in winter, 91

- Relationships between rainfall in the southwest of Western Australia and near-global patterns of sea-surface temperature and mean sea-level pressure variability, 23

- Seasonal climate summary southern hemisphere (autumn 2004): continued neutral ENSO conditions, near-normal broadscale ocean and atmospheric conditions, 73

- Seasonal climate summary southern hemisphere (spring 2004): neutral conditions remain in the tropical Pacific and a warm spring across Australia, 225

- Seasonal climate summary southern hemisphere (summer 2004/05): a neutral ENSO situation with a cooling Pacific. Hot and dry over the western half of Australia, 347

- Seasonal climate summary southern hemisphere (winter 2004): El Niño speculation rises with low rainfall and high daytime temperatures in the northeast, 163

- seasonal forecasts issued by the Australian Bureau of Meteorology: 1998-2003, A verification of publicly issued, 1

- Severe thunderstorms in the Brisbane region and a relationship to the El Niño Southern Oscillation, 197

- Severe thunderstorms over northeastern Queensland

- on 19 January 2001: the influence of an upper-level trough on the convective destabilisation of the atmosphere, 333
- Shorter contribution**
- AIRS hyperspectral data improves southern hemisphere forecasts, 57
- snow season, Climate variability, climate change and the Australian, 177
- Summertime easterly surges in southeastern Australia: a case study of thermally forced flow, 213
- surges in southeastern Australia: a case study of thermally forced flow, Summertime easterly, 213
- synoptic and mesoscale meteorology of Ash Wednesday 1983, A re-examination of the, 35
- temperature lags, Australian summer maximum, 103
- The sensitivity of simulations of air pollution events at Cape Grim to the modelled meteorology, 321
- The South Pacific and southeast Indian Ocean tropical cyclone season 2002-03, 137
- The tropical circulation in the Australian/Asian region - May to October 2004, 151
- The tropical circulation in the Australian/Asian region - November 2003 to April 2004, 61
- The tropical circulation in the Australian/Asian region - November 2004 to April 2005, 241
- tropical cyclone season 2002-03, The South Pacific and southeast Indian Ocean, 137
- tropical circulation in the Australian/Asian region - May to October 2004, The, 151
- tropical circulation in the Australian/Asian region - November 2003 to April 2004, The, 61
- tropical circulation in the Australian/Asian region - November 2004 to April 2005, The, 241
- tropical rainfall potential (TRaP) forecasts for Australian tropical cyclones, Validation of, 121
- track forecast for southern hemisphere tropical cyclones, A consensus, 115
- Validation of tropical rainfall potential (TRaP) forecasts for Australian tropical cyclones, 121
