Total				4.8																	

Observations were drawn from Naracoorte Aerodrome (station 026099)

The closest cloud and daily evaporation observations are from Coonawarra, about 30 kilometres to the south. In most cases these will give a good indication of conditions at Narcoorte but note evaporation is affected by cloud cover, relative humidity, temperature and wind strength during the day. The nearest sunshine observations are at Mt. Gambier. On average Naracoorte can be expected to have marginally more sunshine than Mount Gambier. Sunshine is dependent on cloud amount. See climate maps
