Total				11.8																	

Observations were drawn from Nullarbor (station 018106)

There is no current cloud, evaporation or sunshine data available. The closest cloud, evaporation and sunshine observation site is Eucla 200 kilometres to the west. All conditions will vary between the two sites, evaporation is affected by cloud amount, relative humidity, temperature and wind strength during the day and sunshine is affected by cloud amount. See climate maps for average conditions.
