Total				1.2																	

Observations were drawn from Andamooka (station 016065)

The closest pressure observation is taken at Roxby Downs, 30 kilometres to the southwest. In most cases pressure at Andamooka and Roxby Downs should be within a hectoPascal. For a guide to daily sunshine and evaporation see Woomera, about 80 kilometres to the South. Sunshine hours will be affected by differences in cloud amount. Evaporation is affected by cloud, temperature and wind strength during the day.
