Total				122.0																	

Temperature, humidity, wind, pressure, cloud and rainfall observations are from Tamworth Airport AWS (station 055325). Evaporation observations are from Tamworth (Oxley Lane) (station 055327).
Some cloud observations are from automated equipment; these are somewhat different to those made by a human observer and may not appear every day. Evaporation data becomes available as written records are processed, which may not be for several months.
