

INDEX

SUBJECT INDEX

- A barotropic numerical weather prediction experiment for the Australian region, 129
A frontal surface off the north Queensland coast, 105
A memorial to H.C. Russell, The global atmosphere:- Joint Colloquium, 49
Analysis project: The second experiment - June 1970, GARP basic data set, 193
Analysis, Stability-temperature correlations and their application to objective, 83
An operational evaluation of a numerical analysis-prognosis system for the southern hemisphere, 61
Antarctica in November 1969, Some features of the November 1969 and June 1970 Southern hemisphere analyses - 8. The use of satellite cloud photographs over, 259
Australia, Early mountain observations in, - Correspondence, 52
Australian region, A barotropic numerical weather prediction experiment for the, 129

Barotropic numerical weather prediction experiment for the Australian region, A, 129
Basic data set analysis project: The second experiment - June 1970, GARP, 193

Casey in June 1970, Some features of the November 1969 and June 1970 southern hemisphere analyses - 6. Unusual warming between 700 and 300 mb at, 245
Circulation in the middle latitudes in November 1969 and June 1970, Some features of the November 1969 and June 1970 southern hemisphere analyses - 5., 237
Cloud photographs over Antarctica in November 1969, Some features of the November 1969 and June 1970 southern hemisphere analyses - 8. The use of satellite, 259
Cloudband over the central South Pacific in November 1969, Some features of the November 1969 and June 1970 southern hemisphere analyses - 2. The persisting, 207
Cold spell of mid-March in Victoria re-examined, The, -Correspondence, 58
Comparative evaluation of fine-mesh, limited-area grid schemes, 1
"Corinne", Some features of the November 1969 and June 1970 southern hemisphere analyses - 1. Tropical depression, 205
Cyclone tracks in the high latitudes in November 1969 and June 1970, Some features of the November 1969 and June 1970 southern hemisphere analyses - 7., 248
Cyclones and anticyclones in November 1969 and June 1970, Some features of the November 1969 and June 1970 southern hemisphere analyses - 3. MSL, 217
Cyclones, On the thermal structure of mature Southern Ocean, 34

Early mountain observations in Australia, - Correspondence, 52

Fine-mesh, limited-area grid schemes, Comparative evaluation of, 1
Frontal surface off the north Queensland coast, A, 105

GARP basic data set analysis project: The second experiment - June 1970, 193
Geostrophic flow at 200 mb in June 1970 between 20°S and 45°S, Some features of the November 1969 and June 1970 southern hemisphere analyses - 4. The mean, 231
Global atmosphere: A memorial to H.C. Russell, The, -Joint Colloquium, 49
Grid schemes, Comparative evaluation of fine-mesh, limited-area, 1

Katabatic wind at Mawson in June 1970, Some features of the November 1969 and June 1970 southern hemisphere analyses - 9. The, 263

Mawson in June 1970, Some features of the November 1969 and June 1970 southern hemisphere analyses - 9. The katabatic wind at, 263
Millibar enters old age, The, - Correspondence, 56
MSL cyclones and anticyclones in November 1969 and June 1970, Some features of the November 1969 and June 1970 southern hemisphere analyses - 3., 216

New Guinea and adjacent islands, Solar radiation over, 116
Numerical analysis-prognosis system for the southern hemisphere, An operational evaluation of a, 61
Numerical weather prediction experiment for the Australian region, A barotropic, 129

On the thermal structure of mature Southern Ocean cyclones, 34
Ozone variation in the stratosphere at Aspendale, Victoria, 174

Queensland coast, A frontal surface off the north, 105

Radiation influences on a white-coated thermistor temperature censor in a radiosonde, 22
Radiation over New Guinea and adjacent islands, Solar, 116
Radiosonde, Radiation influences on a white-coated thermistor temperature sensor
in a, 22

Satellite cloud photographs over Antarctica in November 1969, Some features of the
November 1969 and June 1970 southern hemisphere analyses - 8. The use of, 259
Sensor in a radiosonde, Radiation influences on a white-coated thermistor temperature,
22

SIRS-A and June 1970 SIRS-B data over the southern hemisphere, Some features of the
November 1969 and June 1970 southern hemisphere analyses - 10. A comparison
between November 1969, 284

SIRS-B data over the southern hemisphere, Some features of the November 1969 and
June 1970 southern hemisphere analyses - 10. A comparison between November 1969
SIRS-A and June 1970, 284

Solar radiation over New Guinea and adjacent islands, 116

Some features of the November 1969 and June 1970 southern hemisphere analyses - 1.
Tropical depression "Corinne", 205

Some features of the November 1969 and June 1970 southern hemisphere analyses - 2.

The persisting cloudband over the central South Pacific in November 1969, 207

Some features of the November 1969 and June 1970 southern hemisphere analyses - 3.
MSL cyclones and anticyclones in November 1969 and June 1970, 217

Some features of the November 1969 and June 1970 southern hemisphere analyses - 4.
The mean geostrophic flow at 200 mb in June 1970 between 20°S and 45°S, 231

Some features of the November 1969 and June 1970 southern hemisphere analyses - 5.
Circulation in the middle latitudes in November 1969 and June 1970, 237

Some features of the November 1969 and June 1970 southern hemisphere analyses - 6.
Unusual warming between 700 and 300 mb at Casey in June 1970, 245

Some features of the November 1969 and June 1970 southern hemisphere analyses - 7.
Cyclone tracks in the high latitudes in November 1969 and June 1970, 248

Some features of the November 1969 and June 1970 southern hemisphere analyses - 8.
The use of satellite cloud photographs over Antarctica in November 1969, 259

Some features of the November 1969 and June 1970 southern hemisphere analyses - 9.
The katabatic wind at Mawson in June 1970, 263

Some features of the November 1969 and June 1970 southern hemisphere analyses - 10.
A comparison between November 1969 SIRS-A and June 1970 SIRS-B data over the
southern hemisphere, 284

South Pacific in November 1969, Some features of the November 1969 and June 1970
southern hemisphere analyses - 2. The persisting cloudband over the central, 207

Southern hemisphere, An operational evaluation of a numerical analysis-prognosis
system for the, 61

Southern hemisphere analyses - 1. Tropical depression "Corinne", Some features of
the November 1969 and June 1970, 205

Southern hemisphere analyses - 2. The persisting cloudband over the central

South Pacific in November 1969, Some features of the November 1969 and June 1970, 207

Southern hemisphere analyses - 3. MSL cyclones and anticyclones in November 1969 and
June 1970, Some features of the November 1969 and June 1970, 217

Southern hemisphere analyses - 4. The mean geostrophic flow at 200 mb in June 1970
between 20°S and 45°S, Some features of the November 1969 and June 1970, 231

Southern hemisphere analyses - 5. Circulation in the middle latitudes in November 1969
and June 1970, Some features of the November 1969 and June 1970, 237

Southern hemisphere analyses - 6. Unusual warming between 700 and 300 mb at Casey in
June 1970, Some features of the November 1969 and June 1970, 245

Southern hemisphere analyses - 7. Cyclone tracks in the high latitudes in November
1969 and June 1970, Some features of the November 1969 and June 1970, 248

Southern hemisphere analyses - 8. The use of satellite cloud photographs over Antarctica in November 1969, Some features of the November 1969 and June 1970, 259

Southern hemisphere analyses - 9. The katabatic wind at Mawson in June 1970, Some features of the November 1969 and June 1970, 263

Southern hemisphere analyses - 10. A comparison between November 1969 SIRS-A and June 1970 SIRS-B data over the southern hemisphere, Some features of the November 1969 and June 1970, 284

Southern Ocean cyclones, On the thermal structure of, 34

Stability - temperature correlations and their application to objective analysis, 83

Stratosphere at Aspendale, Victoria, Ozone variation in the, 174

Temperature correlations and their application to objective analysis, Stability -, 83

The cold spell of mid-March in Victoria re-examined, - Correspondence, 58

The millibar enters old age, - Correspondence, 56

Thermistor temperature sensor in a radiosonde, Radiation influences on a white-coated, 22

Tropical depression "Corinne", Some features of the November 1969 and June 1970 southern hemisphere analyses - 1., 205

Victoria, Ozone variation in the stratosphere at Aspendale, 174

Victoria re-examined, The cold spell of mid-March in, - Correspondence, 58

Warming between 700 and 300 mb at Casey in June 1970, Some features of the November 1969 and June 1970 southern hemisphere analyses - 6. Unusual, 245
