

Indexes – volume 57

Title index

- Abrupt surface drying and fire weather Part 1: overview and case study of the South Australian fires of 11 January 2005, 299
- Abrupt surface drying and fire weather Part 2: a preliminary synoptic climatology in the forested areas of southern Australia, 311
- A fire danger climatology for Tasmania, 109
- A review of historical tropical cyclone intensity in northwestern Australia and implications for climate change trend analysis, 121
- An investigation into the origin of aerosol nucleation events observed in the Southern Ocean boundary layer, 85
- An investigation of recent orographic precipitation events in northeast Victoria, 235
- Changes in extreme temperatures of Australasian summer simulated by CCAM under global warming, and the roles of winds and land-sea contrasts, 195
- Comparison of official and operational consensus forecasts of daily extreme temperatures in 2006, 95
- Impact of MODIS atmospheric motion vectors on a global NWP system, 45
- Occurrence frequencies and trajectories of mesoscale convective systems over southeast Brazil related to cold frontal and non-frontal incursions, 345
- Quarterly numerical weather prediction model performance summary April to June 2008, 269
- Quarterly numerical weather prediction model performance summary – January to March 2008, 167
- Quarterly numerical weather prediction model performance summary - July to December 2007, 77
- Quarterly numerical weather prediction model performance summary – July to September 2008, 395
- Seasonal climate summary southern hemisphere (autumn 2007): La Niña a distinct possibility in 2007, 65
- Seasonal climate summary southern hemisphere (spring 2007): La Niña finally takes hold, 255
- Seasonal climate summary southern hemisphere (summer 2007-08): mature La Niña, an active MJO, strongly positive SAM, and highly anomalous sea-ice, 379
- Seasonal climate summary southern hemisphere (winter 2007): a developing La Niña and a positive Indian Ocean Dipole, 155
- Southeast Australian thunderstorms: are they increasing in frequency?, 1
- The changing nature of temperature extremes in Australia and New Zealand, 13
- The contribution of locally generated MTSat-1R atmospheric motion vectors to operational meteorology in the Australian region, 359
- The end-to-end severe thunderstorm forecasting system in

- Australia: overview and training issues, 329
- The probability distribution of observed minus expected sea-level pressures; a quality control perspective, 37
- The South Pacific and southeast Indian Ocean tropical cyclone season 2005-06, 53
- The 2007 Antarctic ozone hole, 279
- The tropical circulation in the Australian and Asian region – May to October 2007, 143
- The tropical circulation in the Australian/Asian region – November 2007 to April 2008, 367
- 20 km resolution regional climate model experiments over Australia: experimental design and simulations of current climate, 175
- Using cloudy AIRS fields of view in numerical weather prediction, 249
- Verification of a high-resolution mesoscale NWP system, 213
- Verification of the Bureau of Meteorology's seasonal forecasts: 2003-2005, 273
