

Indexes – volume 63

Title index

- A global evaluation of fronts and precipitation in the ACCESS model, 191
- A new, objective, database of East Coast Lows, 461
- A skill score based evaluation of simulated Australian climate, 181
- A stochastic model for runs of extreme days for a daily meteorological variable, 473
- ACCESS-OM: the ocean and sea-ice core of the ACCESS coupled model, 213
- An evaluation of the precipitation forecasts of the Poor Man's Ensemble for wintertime rainfall across the southern portion of Australia, 315
- An updated analysis of homogeneous temperature data at Pacific Island stations, 285
- Assessment of the MODIS and AMSR-E-Derived SST Products in joining area of Asia and Indian-Pacific Ocean, 391
- Atmospheric circulation features in the ACCESS model simulations for CMIP5: historical simulation and future projections, 145
- Australia's CMIP5 submission using the CSIRO-Mk3.6 model, 1
- Boundary-layer observations in the Pilbara coastal region, 413
- Comparing the version 7 TRMM 3B43 monthly precipitation product with the TRMM 3B43 version 6/6A and Bureau of Meteorology datasets for Australia, 421
- Evaluation of ACCESS climate model ocean diagnostics in CMIP5 simulations, 101
- Evaluation of El Niño–Southern Oscillation in the ACCESS coupled model simulations for CMIP5, 161
- Global simulations of the impact on contemporary climate of a perturbation to the sea-to-air flux of dimethylsulfide, 365
- Implementation of the initial ACCESS numerical weather prediction system, 265
- Lightning flash density 1995–2010 in Brisbane, Australia, 487
- Modifications to atmospheric physical parameterisations aimed at improving SST simulations in the ACCESS coupled model, 233
- Ocean circulation response to anthropogenic aerosol and greenhouse gas forcing in the CSIRO-Mk3.6 coupled climate model, 27
- Quarterly numerical weather prediction model performance summary – April to June 2013, 457
- Quarterly Numerical Weather Prediction Model Performance Summary – October to December 2012, 261
- Quarterly Numerical Weather Prediction Model Performance Summary—January to March 2013, 351
- Quarterly numerical weather prediction model performance summary—July to September 2013, 515
- Rainfall distribution of five landfalling tropical cyclones in the northwestern Australian region, 325
- Seasonal climate summary southern hemisphere (autumn 2012): The transition from La Niña to neutral, 249
- Seasonal climate summary southern hemisphere (autumn 2013): significant heat across Australia, 501
- Seasonal climate summary southern hemisphere (spring 2012): Warmer and drier across much of Australia, along with a new southern hemisphere sea ice extent record, 427
- Seasonal climate summary southern hemisphere (summer 2012–13): Australia's hottest summer on record and extreme east coast rainfall, 443
- Seasonal climate summary southern hemisphere (winter 2012): dry conditions return to Australia, 339
- Simulated and projected summer rainfall in tropical Australia: links to atmospheric circulation using the CSIRO-Mk3.6 climate model, 15
- The ACCESS coupled model: description, control climate and evaluation, 41
- The ACCESS coupled model: documentation of core CMIP5 simulations and initial results, 83
- The considerable impact of earth observations from space on numerical weather prediction, 497
- The estimated potential predictability of seasonal mean Australian surface temperature, 403
- The land surface model component of ACCESS: description and impact on the simulated surface climatology, 65
- The relative performance of Australian CMIP5 models based on rainfall and ENSO metrics, 205
- The sea-ice performance of the Australian climate models participating in the CMIP5, 121
- Towards the development of long-term winter records for the Snowy Mountains, 303
- Trapped mountain waves during a light aircraft accident, 377
- Understanding rainfall projections in relation to extratropical cyclones in eastern Australia, 355
