

WORKSHEET 19

Activity - Weather

Print and copy this worksheet for use in the classroom.

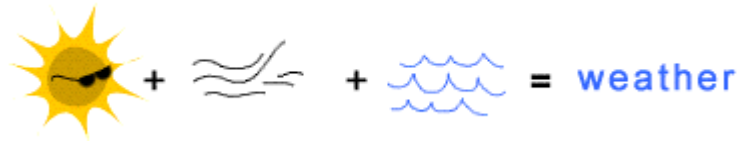

The aim

To learn about the weather and how it affects us.

What is weather?

Weather is a description of what's happening with the air, sun, rain and wind when you go outside.

Three things make up the different parts of the weather. They are the sun, air and water.

The sun gives us heat and light.

The air is all around us and covers the earth like a blanket. When it moves you feel it as wind on your face.

The water is in rivers, lakes and oceans and even in the air as clouds.

Weather is important to everyone's life. It affects the games you play, the clothes you wear, how you feel, farming, building, what you eat, and many other things (I love hot soup on cold days!).

What to do

Read through the work below and answer the questions and do your drawings in the spaces given.

Questions

1. What kind of clothes would you wear on a hot rainy day?

2. Draw some of the clothes you would wear on a hot rainy day.

3. What kind of clothes would you wear on a freezing cold morning?

4. What games would you play on a rainy day?

5. What games would you play on a sunny day?

6. Weather is made up of many things. On TV and radio, you hear weather reports. The weather person talks about different parts of the weather. Write a list of the things that make up the weather? Write as many as you can.

7. Write a letter to a friend telling them about the weather you see outside. Tell them what sort of things you could do in that kind of weather.
