

Ben Fitzpatrick, Met Office

Ben leads the Science IT Data Management and Processing group at the Met Office, which is a software engineering group that includes cylc, ANTS, CMORisation (CDDS), but also has a scientific data focus. Ben is the project lead for Input Datasets within AI4NWP, responsible for a team manufacturing strategic datasets for ML, principally the Met Office's FastNet model in partnership with the Alan Turing Institute. Ben has worked with Momentum partners since his first job at the Met Office helping develop Rose and cylc, and is very keen to collaborate as much as we can on ML in particular.
