

Richard Jones, Met Office

Richard joined the Met Office and the Regional model evaluation and development team in June 2020. Since joining his primary focus has been on technical development and evaluation of large domain convection permitting simulations through the K-Scale project, recently taking on leadership of K-Scale. More recently he has spent part of his time helping to develop RAL3-LFRic capability in the regional suites that are widely used across the partnership and he will be leading on RAL3-LFRic tropical evaluation at the Met Office. In his spare time Richard enjoys long distance running and playing tennis, as well as closely following the ups and downs of Leicester City – his local football club.
