

Rajesh Kumar, Centre for Climate Research Singapore

Bio:

Dr. Rajesh Kumar is a Deputy Principal Research Scientist at the Centre for Climate Research Singapore (CCRS), within the Meteorological Service Singapore (MSS). His primary research interests include air-sea interactions, regional coupled atmospheric-ocean-wave modeling, and wind-wave modeling. He leads the coupled weather and climate modeling initiatives at CCRS and has developed the high-resolution (1.5 km) regional coupled atmospheric-ocean-wave model (cSINGV).
