Molly Smith, CIRES

Bio:

Molly Smith is a meteorologist with the Cooperative Institute for Research in the Environmental Sciences (CIRES) and the National Oceanic and Atmospheric Administration (NOAA)'s Global Systems Laboratory (GSL). She got her bachelor's degree in atmospheric science from Cornell University, and her master's degree in atmospheric science from the University at Albany, where she investigated ensemble variability in tropical cyclone forecasts. Molly currently develops and implements model verification techniques and tools, including process-oriented verification methods, as part of GSL's global, tropical, and high-resolution regional model development efforts.
