

Water Reporting Summary - Victorian Murray Catchment

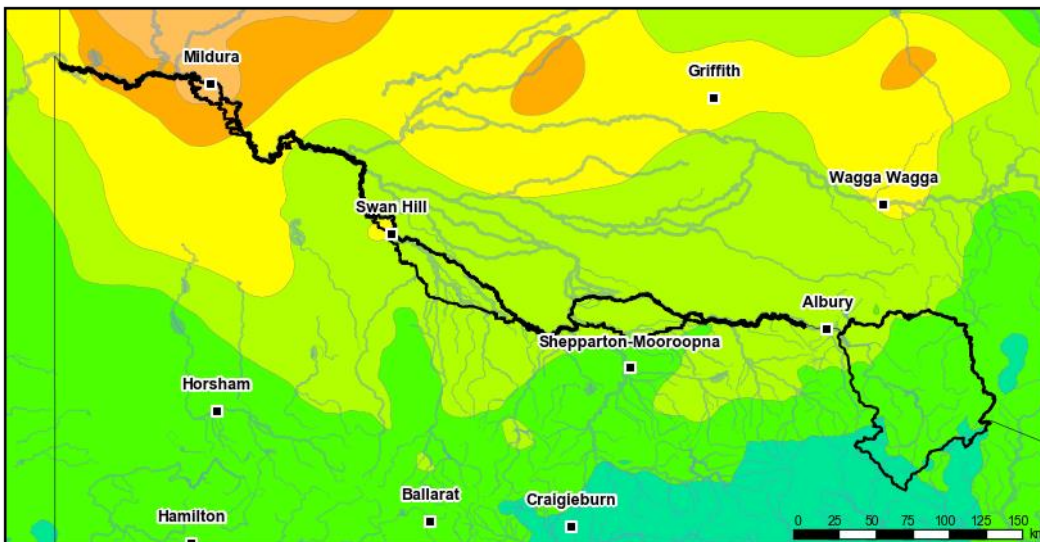

3 February 2020

Overview

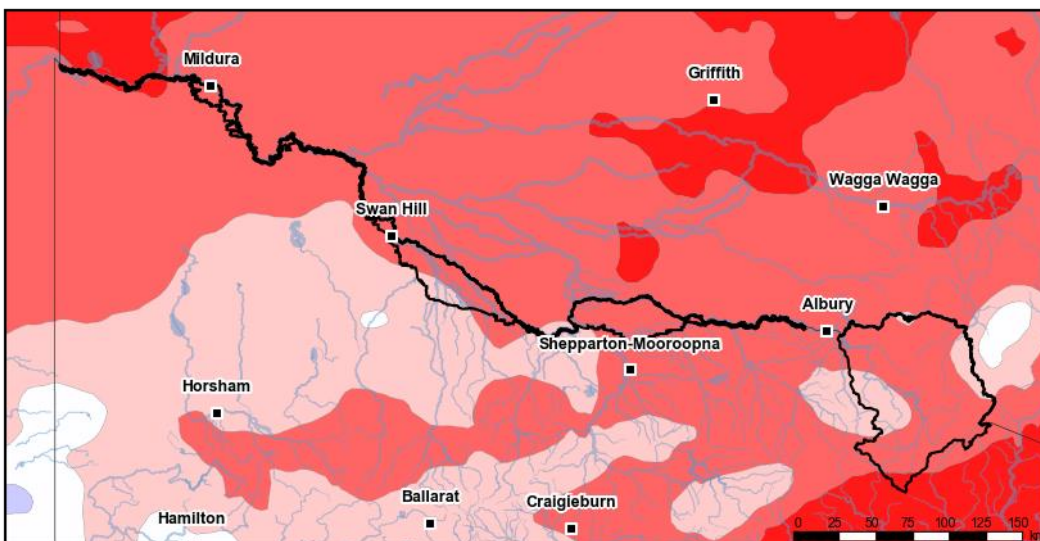

- In the last two weeks, there has been little follow up rainfall since most of the upper Victorian Murray catchment received between 25 to 100 mm on 19 and 20 January 2020. Areas around Mildura received less than 5 to 10 mm over the last 30 days (with the area-average rainfall for the catchment being 59 mm) (Figure 1). This patchy recent rainfall is in the context of the extended dry period since January 2017 with rainfall across the Victorian Murray catchment being very much below average (Figure 2).
- Low storage volumes and inflows have led to low allocation volumes (Figure 3). Announced allocations for high-reliability water shares are currently 56%, which is the lowest level for this time of year since 2008-09 (Table 1).

Figure 2: Rainfall percentiles since January 2017 (Compared to 1900-2019 long-term average). Note: Rainfall percentiles for the period from January 2017 are shown as the Bureau of Meteorology considers January 2017 to be the start of the current dry period for eastern Australia.

How much water is in the storages?

Combined total storage (VIC share*): 1,535 GL (as at end Dec 2019)

*Victoria's share of Dartmouth, Hume, Lake Victoria and Menindee Lakes storages

Source: [MDBA](#)

Storage	% Full (total storage capacity as at 3/2/2020)	% Full (same time last year)
Dartmouth	49%	67%
Hume	19%	32%
Lake Victoria	47%	58%
Menindee Lakes	<1%	2%

Who is the water for?

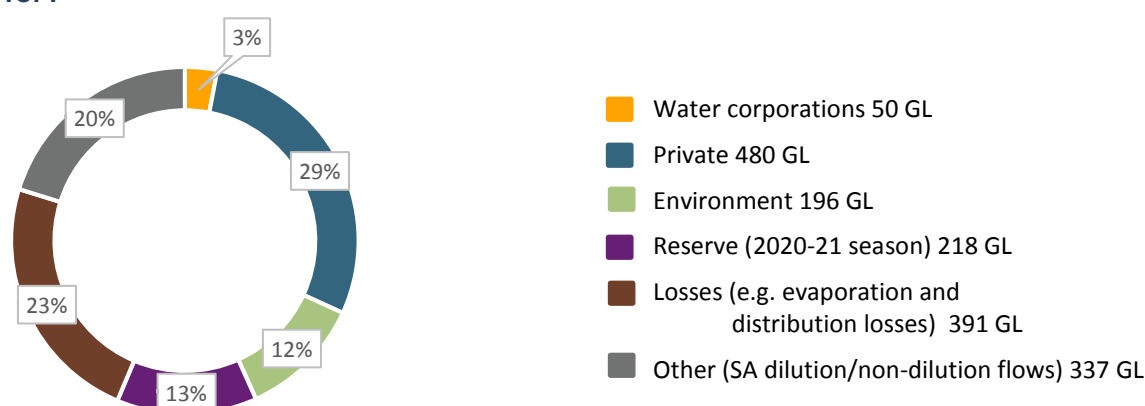

Figure 3: Volumes of water allocations currently available or remaining (% of total remaining) (as at 3 February 2020)

Source: [Northern Victoria Resource Manager](#)

NB: Allocation information shows water currently available in allocation accounts and remaining commitments. Information published by the Northern Victoria Resource Manager differs from information published on the Victorian Water Register as the former includes preliminary environmental water holder use and volumes for operational use by Goulburn-Murray Water private water shareholders.

Table 1: Allocation announcements (seasonal determinations) (%) - Selected licence categories as at 3 February 2020

Licence category	Current announced allocation	Historic comparison (same time of year)
VIC Murray High-Reliability Water Share	56%	Lowest since 2008-09
VIC Murray Low-Reliability Water Share	0%	Same as most years
