

# Heatwave Warning For Northern Territory

Issued at 02:20pm CST on Monday 2 January 2023

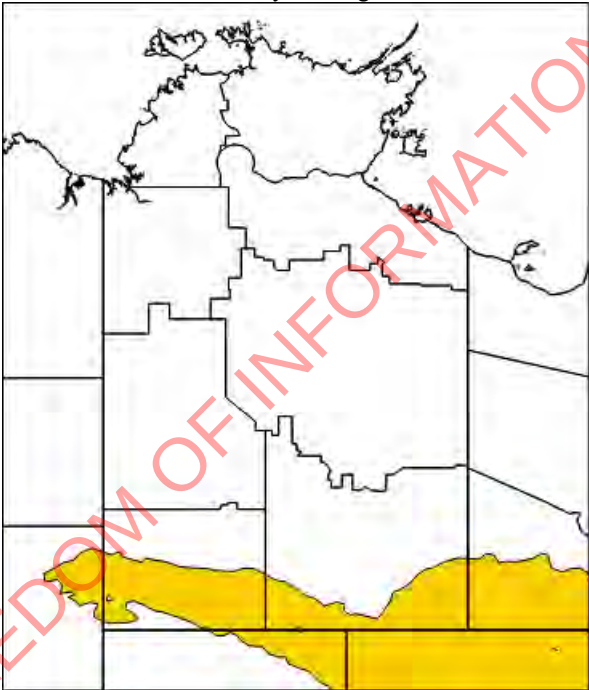

Valid for Monday 2 January 2023

Severe Heatwave Warning for: Lasseter District

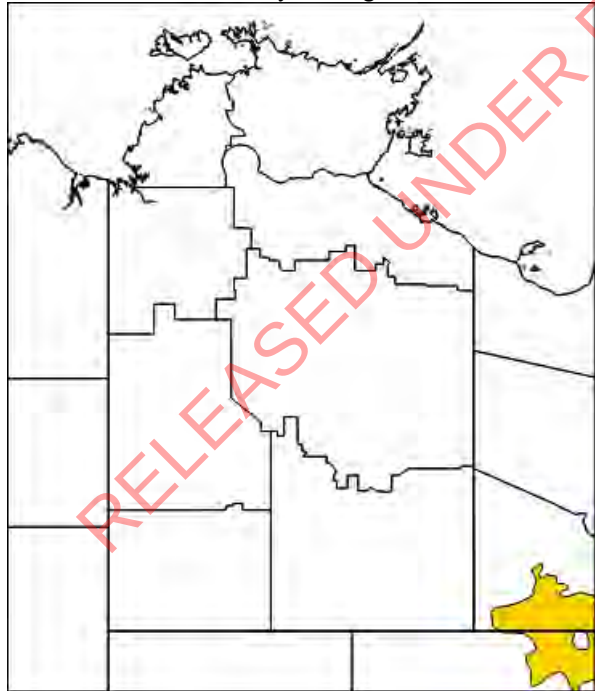

Heatwave Situation for 3 days starting Sat 31/12/2022

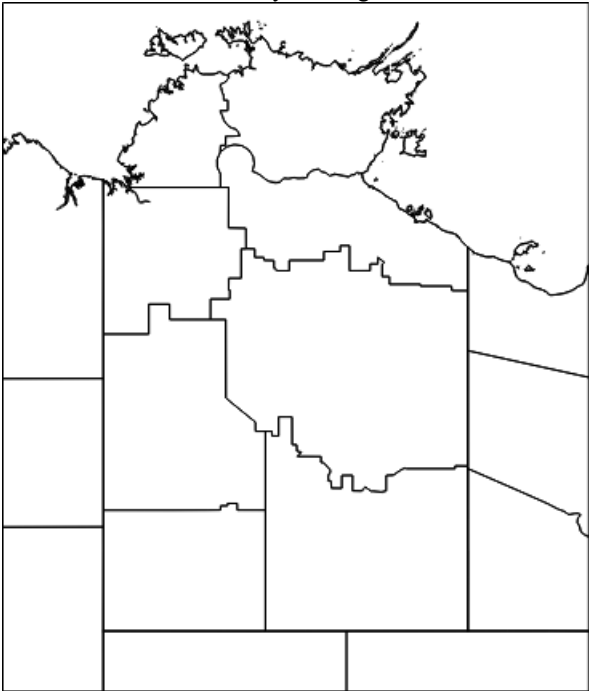

Heatwave Situation for 3 days starting Sun 1/1/2023

Heatwave Situation for 3 days starting Mon 2/1/2023

Heatwave Situation for 3 days starting Tue 3/1/2023

|             |                        |                 |                  |
|-------------|------------------------|-----------------|------------------|
| No Heatwave | Low-Intensity Heatwave | Severe Heatwave | Extreme Heatwave |
|-------------|------------------------|-----------------|------------------|

## Safety Advice

- Severe heatwaves can be dangerous for many people, especially older people, babies, children, pregnant and breastfeeding women, people with medical conditions and people who are unwell.
- Seek a place to keep cool, such as your home, a library, community centre or shopping centre.
- Close your windows and draw blinds, curtains or awnings early in the day to keep the heat out of your home.
- If available, use fans or air-conditioners to keep cool.

For information on staying safe during a heatwave go to the [NT Department of Health web page](#).

## Weather Situation

Maximum temperatures in the high thirties and overnight minimum temperatures in the mid to high twenties will continue in Tuesday.

Severe heatwave conditions are expected to ease by mid week as a cooler southeasterly wind change extends across southern parts of the NT.

Locations likely to be impacted include Yulara.

The next heatwave warning will be issued by 3:00pm CST on Tuesday 3 January 2023

RELEASED UNDER FREEDOM OF INFORMATION

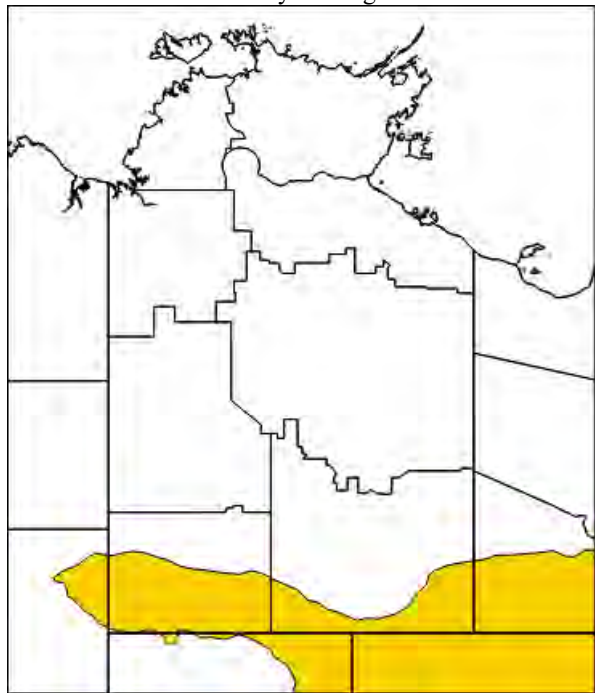

Cancelled Heatwave Warning for Northern Territory

Issued at 01:35pm CST on Tuesday 3 January 2023

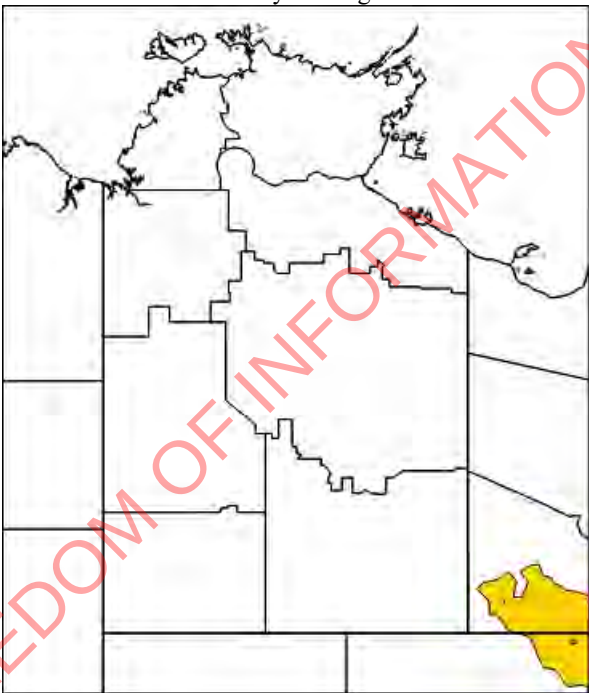

For the rest of Tuesday 3 January 2023

Cancelled Heatwave Warning for: Lasseter District

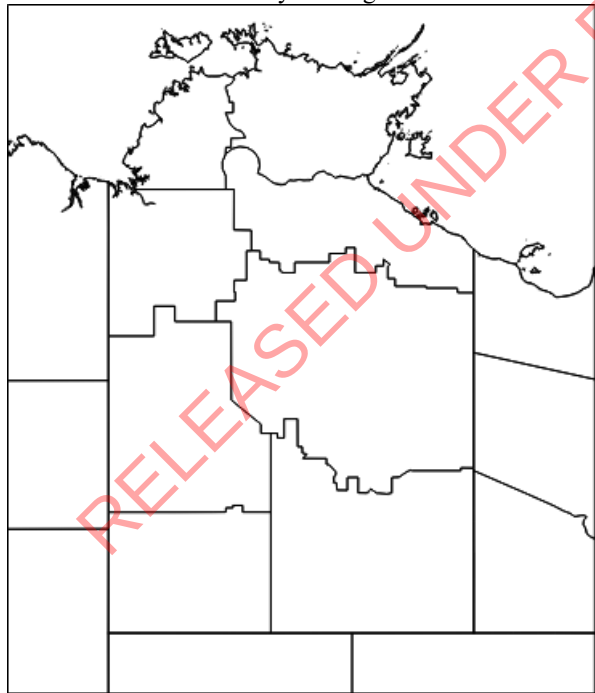

Heatwave Situation for 3 days starting Sun 1/1/2023

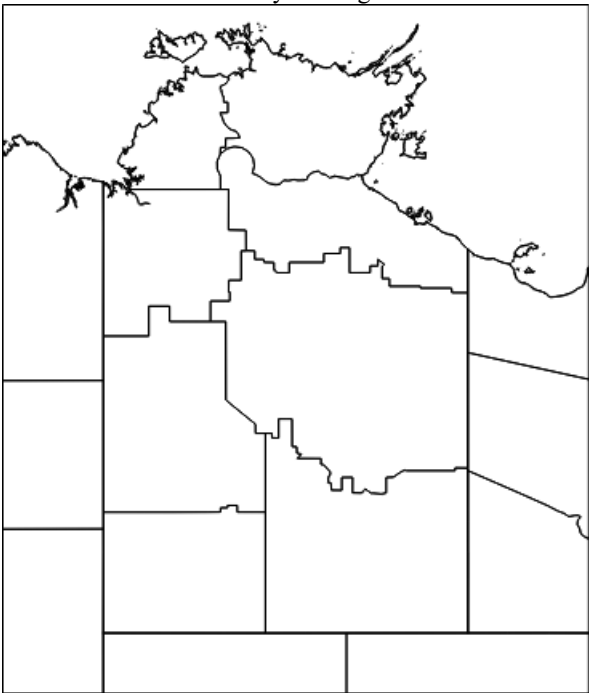

Heatwave Situation for 3 days starting Mon 2/1/2023

Heatwave Situation for 3 days starting Tue 3/1/2023

Heatwave Situation for 3 days starting Wed 4/1/2023

|             |                        |                 |                  |
|-------------|------------------------|-----------------|------------------|
| No Heatwave | Low-Intensity Heatwave | Severe Heatwave | Extreme Heatwave |
|-------------|------------------------|-----------------|------------------|

## **Safety Advice**

- Hot weather can still occur even when a heatwave has ended.
- It may take some days to recover from a heatwave.
- You should continue to take care of yourself and others, including animals.

For information on staying safe during a heatwave go to the [NT Department of Health web page](#).

## **Weather Situation**

Maximum temperatures in the mid thirties are forecast for southeastern NT over the next couple of days, decreasing to the mid twenties to low thirties over southwestern NT. Minimum temperatures will be in the high teens to mid twenties.

No further warnings will be issued for this event, but the situation will continue to be monitored and further warnings issued if necessary.

RELEASED UNDER FREEDOM OF INFORMATION

Heatwave Situation for 3 days starting Sun 22/10/2023

Heatwave Situation for 3 days starting Mon 23/10/2023

Heatwave Situation for 3 days starting Tue 24/10/2023

Heatwave Situation for 3 days starting Wed 25/10/2023

|             |                        |                 |                  |
|-------------|------------------------|-----------------|------------------|
| No Heatwave | Low-Intensity Heatwave | Severe Heatwave | Extreme Heatwave |
|-------------|------------------------|-----------------|------------------|

## Safety Advice

- Severe heatwaves can be dangerous for many people, especially older people, babies, children, pregnant and breastfeeding women, people with medical conditions and people who are unwell.
- Seek a place to keep cool, such as your home, a library, community centre or shopping centre.
- Close your windows and draw blinds, curtains or awnings early in the day to keep the heat out of your home.
- If available, use fans or air-conditioners to keep cool.

For information on staying safe during a heatwave go to the [NT Department of Health web page](#).

## Weather Situation

Maximum temperatures in the high thirties to low forties and overnight minimum temperatures in the mid twenties.

Severe heatwave conditions are expected to continue for this week and into the weekend.

Locations likely to be impacted include Adelaide River, Batchelor, Berry Springs, Bulman, Gunlom, Humpty Doo, Jabiru and Wurrumiyanga.

The next heatwave warning will be issued by 3:00pm CST on Wednesday 25 October 2023

RELEASED UNDER FREEDOM OF INFORMATION

RELEASED UNDER FREEDOM OF INFORMATION

# Heatwave Warning For Northern Territory

Issued at 01:51pm CST on Monday 4 December 2023

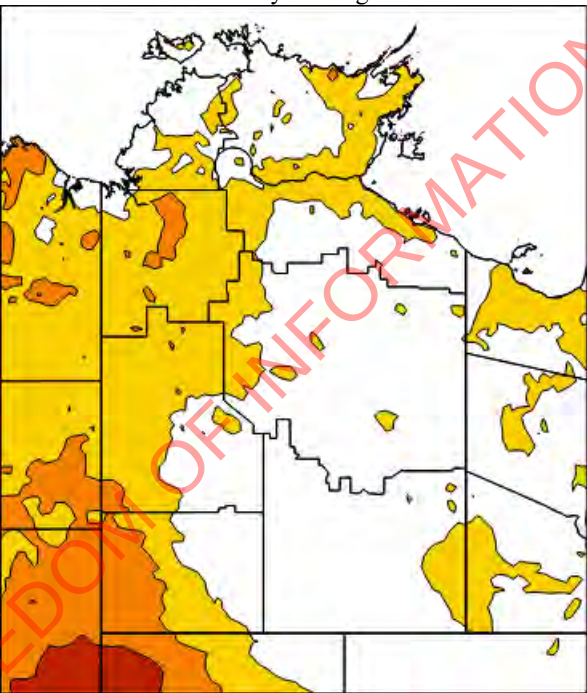

**Valid for Monday 4 December 2023 to Thursday 7 December 2023**

**Severe Heatwave Warning for:** Tiwi, Gregory, Simpson, Lasseter and Tanami Districts

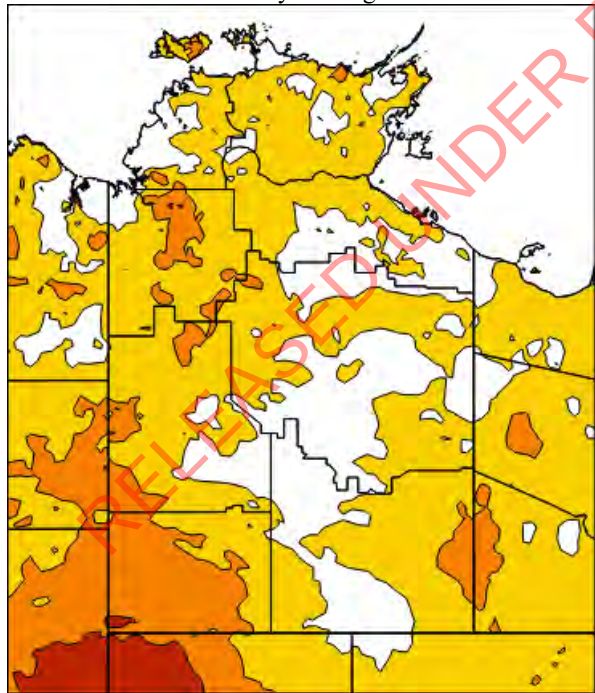

Heatwave Situation for 3 days starting Sat 2/12/2023

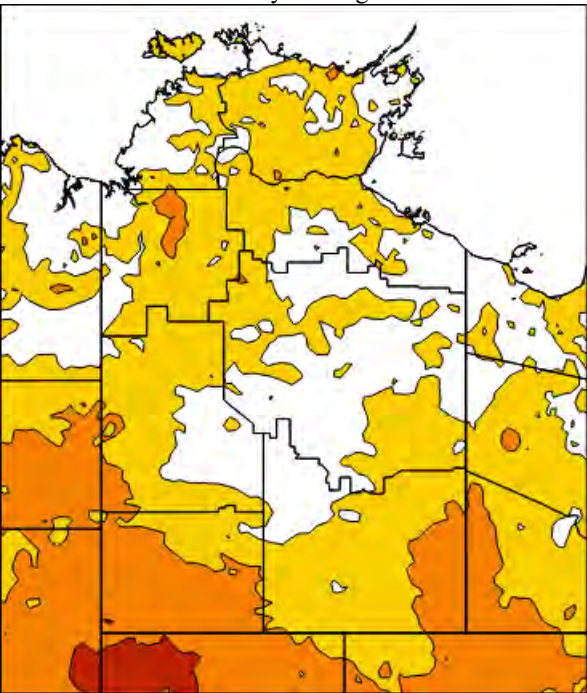

Heatwave Situation for 3 days starting Sun 3/12/2023

Heatwave Situation for 3 days starting Mon 4/12/2023

Heatwave Situation for 3 days starting Tue 5/12/2023

|             |                        |                 |                  |
|-------------|------------------------|-----------------|------------------|
| No Heatwave | Low-Intensity Heatwave | Severe Heatwave | Extreme Heatwave |
|-------------|------------------------|-----------------|------------------|

## Safety Advice

- Severe heatwaves can be dangerous for many people, especially older people, babies, children, pregnant and breastfeeding women, people with medical conditions and people who are unwell.
- Seek a place to keep cool, such as your home, a library, community centre or shopping centre.
- Close your windows and draw blinds, curtains or awnings early in the day to keep the heat out of your home.
- If available, use fans or air-conditioners to keep cool.

For information on staying safe during a heatwave go to the [NT Department of Health web page](#).

## Weather Situation

Maximum temperatures in the low to mid forties although closer to the mid thirties over the Tiwi Islands. Overnight minimum temperatures in the mid to high twenties.

Severe heatwave conditions building over parts of the west and south reaching a peak around the middle of this week with locally extreme heatwave conditions developing over the far southwest. Heatwave conditions expected to ease from the south over the weekend with a milder change.

Locations likely to be impacted include Kaltukatjara, Timber Creek, Wulungurru, Watarrka and Yulara.

The next heatwave warning will be issued by 3:00pm CST on Tuesday 5 December 2023

The next heatwave warning will be issued by 3:00pm CST on Tuesday 2 January 2024

RELEASED UNDER FREEDOM OF INFORMATION

# Heatwave Warning For Northern Territory

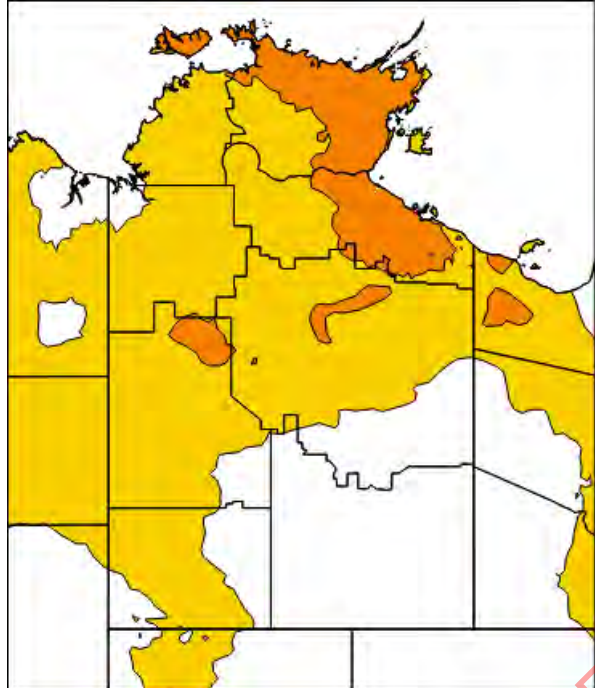

Issued at 02:41pm CST on Tuesday 2 January 2024

**Valid for Tuesday 2 January 2024 to Friday 5 January 2024**

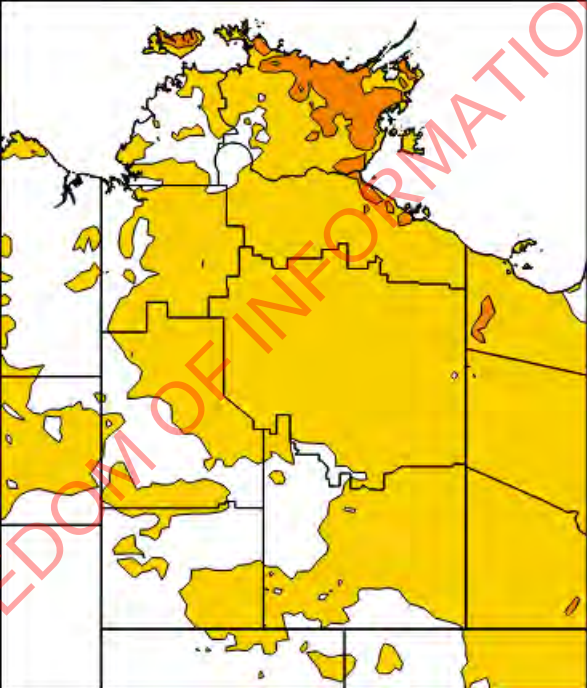

**Severe Heatwave Warning for:** Tiwi, Arnhem, Carpentaria and Simpson Districts

**Cancelled Heatwave Warning for:** Lasseter, Tanami, Gregory, Daly and Barkly Districts

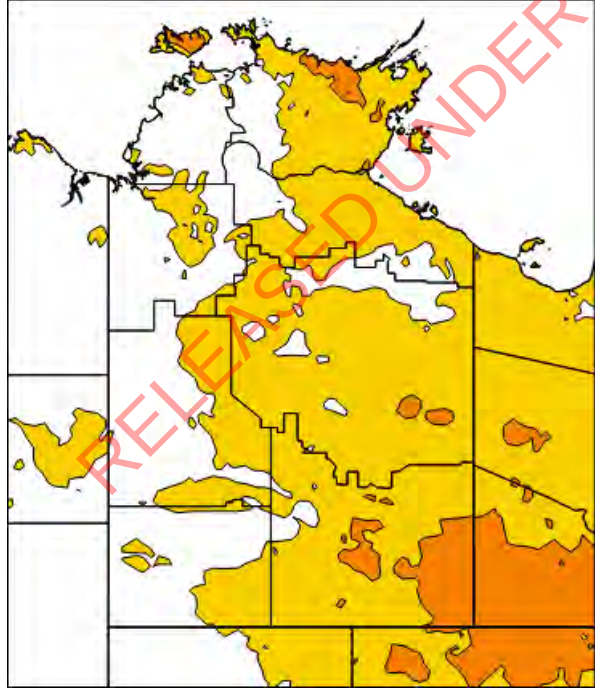

Heatwave Situation for 3 days starting Sun 31/12/2023

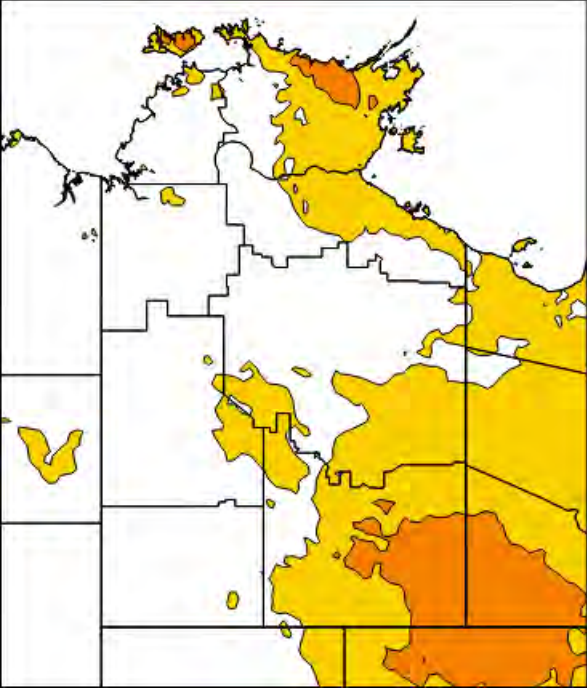

Heatwave Situation for 3 days starting Mon 1/1/2024

Heatwave Situation for 3 days starting Tue 2/1/2024

Heatwave Situation for 3 days starting Wed 3/1/2024

|             |                        |                 |                  |
|-------------|------------------------|-----------------|------------------|
| No Heatwave | Low-Intensity Heatwave | Severe Heatwave | Extreme Heatwave |
|-------------|------------------------|-----------------|------------------|

## Safety Advice

- Severe heatwaves can be dangerous for many people, especially older people, babies, children, pregnant and breastfeeding women, people with medical conditions and people who are unwell.
- Seek a place to keep cool, such as your home, a library, community centre or shopping centre.
- Close your windows and draw blinds, curtains or awnings early in the day to keep the heat out of your home.
- If available, use fans or air-conditioners to keep cool.

For information on staying safe during a heatwave go to the [NT Department of Health web page](#).

## Weather Situation

Maximum temperatures in the mid thirties to low forties over most of the NT, increasing to the mid forties over inland parts south of the Top End, particularly through southeastern parts.

Minimum temperatures in the mid twenties to low thirties.

Extreme heatwave conditions have eased over the NT.

Severe heatwave conditions to continue but expected to ease and contract to far northern parts later in the week.

Locations likely to be impacted include Borroloola, Jervois, Maningrida, Milikapiti, Milingimbi, Ngukurr, Pirlangimpi and Wurrumiyanga.

The next heatwave warning will be issued by 3:00pm CST on Wednesday 3 January 2024

Heatwave Situation for 3 days starting Sat 20/1/2024

|             |                        |                 |                  |
|-------------|------------------------|-----------------|------------------|
| No Heatwave | Low-Intensity Heatwave | Severe Heatwave | Extreme Heatwave |
|-------------|------------------------|-----------------|------------------|

## Safety Advice

- Severe heatwaves can be dangerous for many people, especially older people, babies, children, pregnant and breastfeeding women, people with medical conditions and people who are unwell.
- Seek a place to keep cool, such as your home, a library, community centre or shopping centre.
- Close your windows and draw blinds, curtains or awnings early in the day to keep the heat out of your home.
- If available, use fans or air-conditioners to keep cool.

For information on staying safe during a heatwave go to the [NT Department of Health web page](#).

## Weather Situation

Maximum temperatures in the low to mid forties with overnight minimum temperatures in the mid to high twenties.

Severe heatwave conditions expected to extend eastwards into the Simpson district by Sunday, and persist over southern parts of the state well into next week.

Locations likely to be impacted include Kaltukatjara and Yulara.

The next heatwave warning will be issued by 3:00pm CST on Saturday 20 January 2024
